

## ABSTRACT

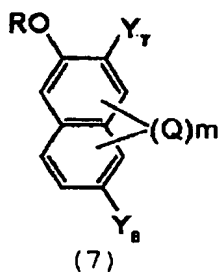

The present invention provides an aminocarbonylnaphthol derivative represented by formula (1) and process for preparing the same:

5            wherein each  $Y_1$  and  $Y_2$  is selected from the group consisting of aminocarbonyl group, carboxyl group and groups represented by formulae (2), (3) and (4), provided that at least one of  $Y_1$  and  $Y_2$  is aminocarbonyl group.

10            The present invention also provides a novel cyanonaphthol derivative represented by formula (7) and a salt thereof as well as process for preparing them:

          wherein each  $Y_7$  and  $Y_8$  is independently selected from the group consisting of cyano group, groups

represented by formulae (2), (3) and (4), carboxyl group and aminocarbonyl group, provided that at least one of  $Y_7$  and  $Y_8$  is cyano group.
